

Charley making some repairs to his sled.

Charley would be required to stay at the mandatory 24-hour stop for 25 hours and 28 minutes to make up the 2-minute starting differential.

To figure the answer:

70 (total bib numbers) - 26 (Charley's bib number) = 44

44×2 (2-minute start differential) = 88 minutes will be added to his 24 hours

24 hours 88 minutes or 25 hours 28 minutes
