

Video Writing Assignment

What do you feel has been the biggest change the Iditarod has seen through the years? Defend your answer with at least 3 supporting details from the video.

I feel that the biggest change the Iditarod has had throughout the years has been that women have won. An example is Susan Butcher, a while ago, when the Iditarod was in its early days, men didn't think that women had a chance to win, but Susan Butcher worked just as hard and won the race. Not only once, but four times, and all she did was give it her best. People thought that women were not strong enough to even cross the finish line, but they did, and I believe that showed that women have an equal chance to win as men, if they give it their all. I think that treating women with respect increased immensely throughout time, because of their everlasting marks in the past.
