

Iditarod

WIFE
 YELLS THE
 MUSHER AS
 THEY RUN IN
 THE RACE!!

The Iditarod always starts in Willow, Alaska in March. The Iditarod is a dog race with a sled and a musher. The Iditarod is a long race they have to race **1,000** miles in the wilderness. There are mostly **65** teams starting the race each year. The Iditarod is a big deal for lots of the families in Alaska. In the Iditarod women and men can race against each other. I think the coolest thing about the Iditarod is that you're not with other people, it's just you and your dogs.

DO YOU
 KNOW THE
 HISTORY OF
 TENNIS ???

Tennis

In the beginning of tennis the ball was hit with the hand. Then they invented the leather glove, so it wouldn't hurt their hand. Rackets were made of laminated wood, with heads around **65** inches. In **1960** Wilson produced the tennis racket **T2000** made with steel with wire wound around the frame to make string loops. This product made tennis so much easier. Tennis was very popular in England and France. Now it is very popular in any place. Usually you play against one other person.
