IDITAROD

Football is very unique but not as unique as the Iditarod. Football is a sport that girls can play but not in the NATIONAL FOOTBALL LEAGUE. Everywhere but the USA they call football "soccer" and soccer "football".

There are all kinds of ways to play football like tackle football and flag football. But the way they play in the Super Bowl is tackle football. Football is a really hard choice against the Iditarod.

Iditarod is a dog mushing sport. You have to have really good sportsmanship to be in the Iditarod. A lot of people do not know what the Iditarod is if you do not know, it is a sport where dogs participate. Iditarod is more unique than a lot of other sports. In the Iditarod you have to help people in need. You can not just pass them in your sled you have to help them. In the Super Bowl you are not going to help someone who is hurt when you pass them until the play is over. The Iditarod is where you start in Willow, Alaska and travel in a sled while dogs are pulling you. The person that comes in last place gets the red lantern. The Iditarod is one of the best sports. The first Iditarod was in 1973. But the first person to win the Iditarod was Dick Wilmarth. So it is a hard choice but Iditarod wins! The Iditarod it is not about winning it does not matter what place you are in it's about having fun with your dogs and being in the wild.
