

## Task Card #1

You are cruising down the Iditarod trail and are quickly approaching Shaktoolik. You know you are headed out over the ice of Norton Bay next. This part of the trail will be a very windy. You reach into your bag and realize you forgot a hat that will protect you from the wind! With the given materials create a hat that will provide you with the protection you need to make it to the next checkpoint.

## Task Card #2

You are cruising down the Iditarod trail and are miles from the next checkpoint, McGrath. You start to notice snow beginning to fall, and it is very WET and heavy. You reach into your bag and realize you forgot a hat that will protect you from the wet snow! With the given materials create a hat that will provide you with the protection you need to make it to the next checkpoint.

## Task Card #3

You are cruising down the Iditarod trail and are quickly approaching Rohn. The sun is shining bright, and it feels nice on your face. However, you know that you must protect your face from too much sunlight. You reach into your bag and realize you forgot a hat that will protect you from the sun! With the given materials create a hat that will provide you with the protection you need to make it to the next checkpoint.
